Monitor, and Mouse
Plug and Play
Two Year Warranty**

PACKAGE CONTENTS:

- ◆ One HKS104 KVM Switch
- ◆ Two Sets of 3-in-1 Cables
- ◆ One Quick Installation Guide

Get Connected with Hawking

With the Hawking HKS104, there is no better way to save time and money. The HKS104 KVM Switch is a 4-port PS/2 type KVM Switch that provides compact and integrated all-in-one KVM connectors on the Switch side. It enables users to access, control, boot and reboot multiple computers using only one keyboard, monitor, and mouse. Furthermore, the 3-in-1 KVM cable is designed to integrate the keyboard, monitor, and mouse interfaces all into one connector, thus saving a lot of unnecessary time and effort. Also, by allowing a single console to manage all the attached PCs, the HKS104 eliminates the expense of purchasing a separate keyboard, mouse, and monitor - making the HKS104 an excellent tool for the management of four computers on either SOHO or corporate desktop

Features

- . Access and control 4 PCs using one keyboard, monitor, and mouse
- . PS/2 keyboard and mouse control
- . Support Logitech NetMouse®, Microsoft IntelliMouse®, IntelliMouse Explorer® or other compatibles
- . Support DOS, Windows 3.x/95/98/SE/ME/2000/XP, Unix, Linux
- . Hot-plugging PCs for maintenance without powering down the KVM Switch or PCs
- . Direct channel selection by push buttons or keyboard hotkeys
- . Plug-and-play, no Windows driver software needed
- . Buzzer sound for port switching confirmation
- . Keyboard/Mouse state saved and restored when switching port
- . LED indicators for easy status monitoring
- . 3-in-1 Cable - An integrated keyboard, monitor, and mouse connector for PC port
- . PS/2 interface power

READY, NETWORK & GO!

It's easy to install, it's easy to use!

Step 1 - Turn off all the computers and connect

Connect the shared keyboard, monitor, and mouse to the corresponding connectors on the rear of your KVM.

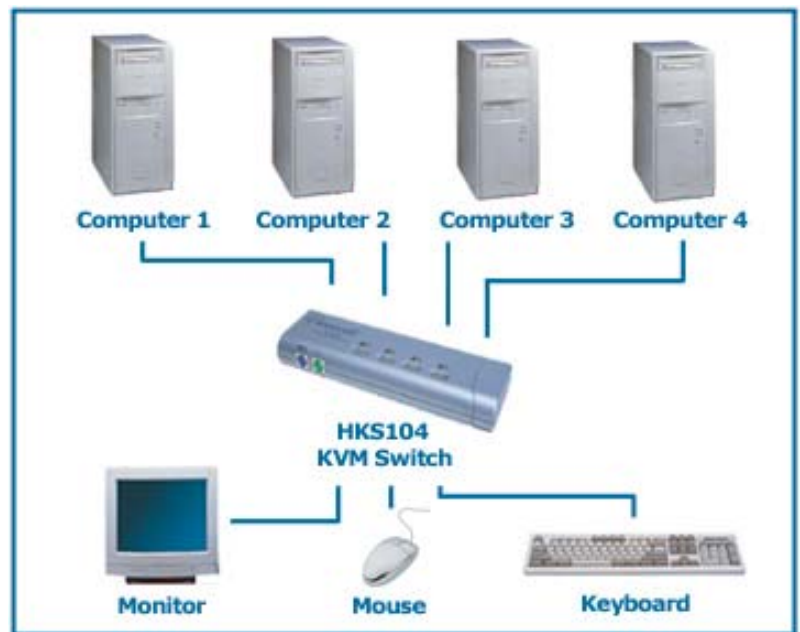

Step 2 - Plug in the PCs

Use the included 3-in-1 Combo KVM cable to connect your computers. For extension, you can use individual standard keyboard, mouse, and monitor extension cables

Step 3 - Get Started

Power on the connected computers and your systems should recognize the device.
