- Live view from your camera using tablets, smartphones, Mac or Windows computers
- 3X digital zoom captures close up view of your subject from a remote location

Easy Setup for a Wired or Wireless Connection!
This Hawking HawkVision Universal Smart Cam eliminates the typical complicated setup required for most IP cameras. Simply plug the camera into your pre-existing LAN network via ethernet cable, insert the included CD into your computer, and run the IPFinder software to find your camera. Once connected, you can use the camera as a wired device, or configure your camera to connect wirelessly. You'll never have to change your router settings or sign up for a third party dynamic DNS service like with previous IP cameras.

Intuitive Software Included for Monitoring and Controlling
Included software provides intuitive operating and controlling feature for the camera. It allows quick and easy view from any computer. For users with multiple Hawking cameras*, the software can capture up to 16 cameras per screen. Software features include power on/off schedule, email alerts, video recording, one-way audio, image capture, and more.

Remote Viewing with Your iOS® and Android® Device
In addition to the software, the HNC3W also includes a free downloadable app for smartphone and tablet which allows remote viewing from anywhere. For users with multiple Hawking Cameras*, the app also captures multiple camera views per screen. View your pet while you are at work, watch your baby from the kitchen or living room, monitor your shop or ware-house from your office or while you are on vacation.

Secure Mounting Hardware
The HNC3W comes stock with a secure mounting bracket. Use this bracket to make sure your camera is out of harms way and to guarantee a reliable, accurate image. Angle your camera directy at your viewing area with the flexible arm and lock it in place with the rear bolt. Seamless black casing ensures that your camera will blend in with its surroundings.

Crisp Video Feed, Even in Complete Darkness
View accurate live feed even in complete darkness with the Infrared lights that automatically turn on when lighting is dim. Premium MPEG video footage guarantees that you'll have even the smallest details captured through your HNC3W. Take snapshots directly from the high quality video feed or record directly to your computer for easy access later on. The HNC3W can also be configured to record or notify you whenever motion is detected during your selected time frame.

*Hawking Cameras, include but are not limited to HNC3W and HNC5W
